Comments

ability to help break down complex concepts from class, and professor's obfuscating language

Before homework was due, I went to office hours and she could sometimes walk me through a troubling problem.

She broke down difficult concepts.

N/A

She was very hands-on and walked me through whatever I was struggling with

N/A

How can this teaching assistant's (Thu Tran) teaching be improved?

Comments

more transparency with students, maybe coming to class period if possible

She disagreed with the professor on the language in lots of questions as it was frequently unclear. I think she had a better idea of what problems were better suited for the students.

N/A

Doesn't require improvement

Already excellent

Comments

Access to the test for review sessions

The distribution of the tests in class was the worst I've ever seen. They just made one pile of all of the scantrons for a huge lecture so it was impossible to find my test. It didn't seem like they cared about the class. It was very frustrating.

By maybe coming to class and introducing yourself?

N/A

The TAs consistently took forever to grade our tests, even though they were just scantrons. But i only went to Luea's office hours. I dont know anything about the TAs or even if they had office hours

Be more present and knowledgeable on the material.

Perhaps Thu Tran could advertise more group studying opportunities

Comments
Not applicable
Her office hours help with assignments/preparing for tests
I never interacted with her
Her ability to help me better understand the material in a simpler manner
I didn't interact enough with her to know.
Thu needs to learn how to grade
-
She did a good good of grading assignments and exams.
She is very patient.

How can this teaching assistant's (Thu Tran) teaching be improved?

Comments
Not sure
A couple times I have gone to office hours for help and she was not able to really give me an answer
She did everything right
She gives VERY little partial credit
I didn't interact enough with her to know.
Grade consistent with Olani's course objectives.
-
Not in many ways other than overall confidence.

In what way(s) did you interact with this teaching assistant (Thu Tran)?

What aspects of this teaching assistant's (Thu Tran) teaching were most helpful to you?

Comments

I never interacted with the teaching assistant

Tran made sure to help us work through problems we didn't understand.

Never really interacted with Thu but her grading was fair.

She was always available.

She was nice and understanding. She expressed concern for the students and wanted to advocate for them. She also was very smart and gave the answers in a clear and concise way.

How can this teaching assistant's (Thu Tran) teaching be improved?

Comments

More detailed feedback on homework

She is great.

In what way(s) did you interact with this teaching assistant (Thu Tran)?

What aspects of this teaching assistant's (Thu Tran) teaching were most helpful to you?

Comments

Thu helped me understand HW and prep for exams. She was very personable, very knowledgeable about all the topics, and was able to explain them in a more concise and clearer way than they were described in class

Thu is fantastic! She's great at teaching concepts and actually indicating the significance of the material. She was invaluable!

Thu would patiently go through concepts, breaking them down deep enough that I could truly understand them. This allowed me to reinforce what I learned in class.

Thu was so so helpful. Her review sessions and her explanations of things actually helped me learn the material more so than in class. Also, she was able to help me walk through the homework problems which helped me understand the concepts.

She's very helpful and knowledgeable.

She is really helpful during office hour and always responds to my questions via email quickly

Going through things slowly and step by step

She was always available and really explained in a simple way the material.

Her math acumen and patience in helping students during office hours was stellar

Review sessions and test prep

Thu's willingness to go the extra mile and meet with students one on one was extremely considerate and helpful. She not only helped with my comprehension of the material but instilled confidence in my abilities along the way. I am very thankful for Thu's help and would consider her to be the best teaching assistant I've met in the department.

Thu was awesome. She broke down difficult concepts step by step to make them easier to understand and apply to complex math questions. She made understanding this material much easier for me. I really appreciated her help.

Very helpful and clear in explaining concepts.

How can this teaching assistant's (Thu Tran) teaching be improved?

Comments

it's good already

She's amazing! Nothing!

She is great as she is

I only wish that she had more review sessions. She had one for one of our problem sets that was particularly helpful.

Office hour explaining how to approach homework questions
She was available outside of her normal office hours
Thu was AMAZING. The way she would walk us through concepts, both from the class and review concepts from previous economics classes, really helped me understand where different parts/equations from the model were derived from. She was very responsive to emails, and she really helped me understand the homework. I liked that she would approach homework questions from a different perspective than Professor Rodrigue used in class, as sometimes it was a lot more intuitive for me to solve questions using her methods/approaches. She was excellent at summarizing models (which she did when she led our first review session) and also worked to help us understand how the results of models would change in different circumstances, which were usually the hardest questions on problem sets.
Her excellent way of explaining things in office hours. Give this woman a raise. She deserves it. Best teaching assistant I've ever interacted with at Vanderbilt. She was also super helpful in emails. Thu is super knowledgeable in math concepts and being able to explain them in simple ways.
She was often available to ask questions, and she graded very fairly
Thu was such a good teacher and was very clear about the methods to use solving problems. She helped so much with my success in the class.
Thu was awesome. She came to most classes so was fully up to date on course materials. She was always prepared in office hours and she was very helpful and responsive over email.
Thu was a huge help when studying for the tests. She was always available to help myself and my peers understand the answers to the practice questions for the tests that we were having difficulty with. Additionally, the review session she led of the beginning of the year was invaluable, and I might have dropped the course if she did not make me feel as comfortable with the material. I had not taken micro since sophomore year so I was rusty, but she brought me up to speed.
Thu was always available to help even outside of office hours. She had no problem with sitting down in a one on one setting for an hour to go over a single problem
Her office hours were great in order to complete homework assignments.

How can this teaching assistant's (Thu Tran) teaching be improved?

Comments
I hope that she will have more confidence in how much she helps us as students! The way she explained concepts was really easy to understand. But besides that, I can't think of a way she could have worked to be more helpful to us in this course.
Nothing!
Sometimes she isn't fully prepared or doesn't know the material very well
None— truly one of the best TAs I've had at Vanderbilt.
I thought Thu was really great, one of the best TAs I've had during my time at Vanderbilt.
I think Thu is great.

Comments
answering questions in time
I had no idea we had a teaching assistant.
Thu Tran is one of the best TAs I have interacted during my studies here at Vanderbilt! Her ability to explain clearly every concept and material was impressive for me. The TA was extremely helpful, and I so happy I took advantage of the office hours.
Thu Tran did a review session before our first midterm that was helpful.

How can this teaching assistant's (Thu Tran**) teaching be improved?**

Comments
no
There was no review session before the second midterm. That would have probably been beneficial.

The homework and practice example questions were the most helpful to me to put what I learned into practice and really solidify it.
Regular class time, real-world examples
The lectures.
Professor Thu did an excellent job at teaching this course through zoom. By including a participation aspect and asking that students turn on their cameras if possible, she created a classroom environment and community. She explained concepts in great detail with many examples to make sure the content was digestible. Additionally, she recalled previously learned concepts before introducing new ones so we could understand how the topics played into each other and so we didn't forget old material. She split up the lessons into an appropriate amount of material so we didn't lose interest. I also really appreciated her practice materials and how she stayed after class to answer any questions. She was also very understanding and kind when I did not understand something.
Thu was super kind, and it was easy to follow along with her class because she took the time to explain subject matter thoroughly
The lectures were both engaging and informational every day.
The very clear slideshows and relatable examples used throughout the class time.
I liked how the homework assignments were set up – I think they were comprehensive enough to review all the material but also assigned with enough time to spread out the work, have time to ask questions in class, and fully absorb the material they were covering.
Office hours and the article summaries. She's really sweet and patient, and it's clear she really wants you to grasp the material she presents. The article summaries are enjoyable, because it helps me connect different concepts that we learn to the real world and quite literally makes me as a student see principles of economics take place in life. Also, her presentations are smooth and she makes great use of the whiteboard feature on Zoom.
assignments and feedback
Lectures were thorough

What improvements to the course (ECON 1020 02) would you recommend?

It might be helpful to have more visuals, since a lot of the slides were mostly words and sometimes it can be difficult to visualize something. It was still very helpful though and that's just a minor recommendation, not something necessary to learning the content well.
It is hard to make improvements when the platform is online. Perhaps more activities in collaboration with classmates.
Nothing! This was the best summer course.
The only thing I'd recommend has to do more with the online course than the instructor. Just being able to have questions more easily asked would be nice
Probably more conversations, but that was hard due to the online format.

I would have liked to have some sort of project or individual contributions to the class. I think it could have been interesting if each day a different class member presented for 5 minutes or so on an article or something related to the class material. I think this would have been a good way to increase class engagement and to give the opportunity for each student to expand on the material in their own way.
maybe a bit more material on the slides to look back to when studying/a study guide?
clearer grade updates

This professor was significantly better than most other academic professors I have had at Vanderbilt, even those with tenure and years of teaching experience. She really cares about helping us and it shows.
